

Titan™ A New Standard in Laser Aesthetics

While millions are still searching for the fountain of youth, today's savvy patients and consumers are looking for treatments and services that work in concert with their highly sophisticated skin care products to provide

safety performance with regard to post-procedure complications and has minimal discomfort compared to similar radiofrequency procedures. After careful research into different lasers and treatment modalities, these are the primary reasons Titan™ is our skin tightening treatment of choice. The Titan™ Procedure delivers remarkable skin-tightening results without the downtime, scars or excessive costs associated with surgical procedures.

HOW IT WORKS

The Titan Procedure™ utilizes an infrared light source to safely apply heat to the dermis, causing collagen contractions, which can lead to long-term collagen rebuilding. Improvements in skin tone will give you a refreshed, energetic, younger look.

The Titan's proprietary light source emits a range of infrared wavelengths that are absorbed by water, providing a safe and comfortable solution for tightening the skin. Since the epidermis is protected through continuous contact cooling, it requires no anesthesia and no downtime. This is the Titan difference.

WHO IS A CANDIDATE FOR TITAN?

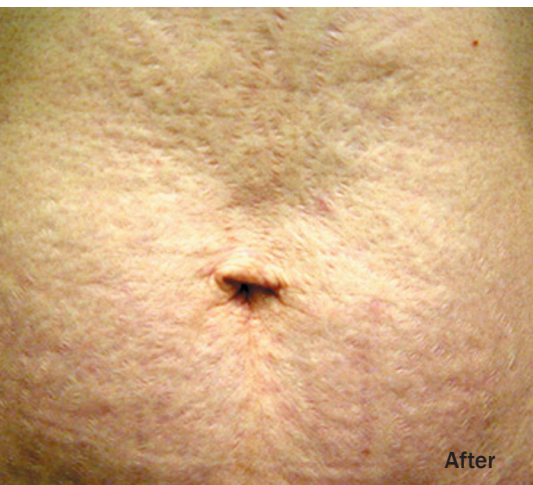

The Titan Procedure™ is ideal for

someone in their 30's to mid 60's who is ready to augment their appearance with a non-invasive procedure that yields subtle, yet noticeable results. Without significant pain or down-time, it can erase the years and achieve a more vibrant and overall refreshed look. The procedure is appropriate for someone who has noticed that his or her face and neck are not as taut as they once were, a new mother whose tummy isn't as tight and smooth as it used to be, or a patient who has experienced significant weight loss and needs to tighten loose skin are ideal candidates.

Men and women whose skin is beginning to show the signs of age around their necks and jaw lines (turkey necks and jowls) are popular candidates for Titan.

Reflections Med Spas offers the Titan Procedure™ as well as many other aesthetic and vein treatments... here in Coeur d' Alene. To learn more about Titan, look it up on the web at www.Titanskin.com or on our website at www.reflectionsmedspas.com or call us at (208) 676-8346 for a complexion and skin analysis to determine if you are a candidate for this new, exciting technology.
